DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a) because they fail to show electrode 21 as described in the specification at page 20. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant recites electrode members affixed to a support in claim 1 and in claim 3 requires the electrode members to be the support. Requiring an element to be affixed to itself is indefinite. Applicant should clarify whether the electrodes are connected to a support or that the electrodes serve as the support for some other element.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3763

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3, 13, 28, 33, and 61 are rejected under 35 U.S.C. 102(e) as being anticipated by HOFMANN (U. S. Patent No. 6,009,345). Hofmann discloses a device for manipulating a molecule in vivo where the sum of electrode members and conductive portions is at least three, and having two rectangular electrode member 124, 126 with conductive portions are separate from nonconductive portions, first and second electromagnetic fields are generated to manipulate a molecule and cause cell permeability via different voltages, the portions are on separate electrode members (See Fig. 6). Hofmann discloses that the electrode arrangement of Fig. 6 is as shown in the other embodiments (See figs. 1a, 1b). It is clear that the electrodes 128, 130 as well as 136, 138 (not shown) are separately addressable as are electrodes 28, 30, 36, and 38 through switches 42, 52, 48, and 58. Electrodes 128, 138 and 130, 136 are on different electrode members 124, 126. The electrode members are displaceable such that the electrodes can be placed close together. Hofmann further discloses a pulse generator with controller (6:15-29). See col. 8, line 54 - col. 9, line 52.

Response to Arguments

Applicant argues that Hofmann does not show conductive portions separately addressable. The examiner disagrees because Hofmann describes the conductive portions having separate switches, making them separately addressable. See cites above.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
